_NICK SAVELIEV

Software Engineer

with experience in web development using TypeScript, React, Next.js, Vue.js, Nuxt, and backend development with Node.js and Express. I've also built mobile apps with React Native. Additionally, I have a background in game development and experience with software development using C and C++.

_SKILLS

- TypeScript • JavaScript • React • React Native • Nuxt
- Vue.js • Next.js • Express • Node.js • PostgreSQL
- SCSS • HTML • CSS • C/C++ • C# • Jest • Docker
- Git • Teamwork • Problem-solving • Attention to details

_PROJECTS

UX/UI Designer website – Clean and responsive portfolio site

TypeScript | Vue.js | Nuxt | SCSS | Figma

- Responsive layout for all screen sizes.
- Collaboration with a UX/UI designer.
- Implemented light/dark theme toggle with dynamic styles.
- Used dynamic SCSS variables for seamless theming.

Personal Website – My own portfolio website

TypeScript | React | Next.js | Figma

- Implemented adaptive functionality.
- Collaboration with a UX/UI designer.
- Worked with swiper.js framework.

Hero Fan - A Full-Stack (Marvel) Fan Webpage

JavaScript | React | Next.js | Node.js | SQL | API | Docker

- Integrated external Marvel API
- Implemented user authentication and password encryption
- Worked with databases on the back-end
- Managed communication between the front-end and back-end via REST API requests

SMTH - React Native-Based App for Stress-Free Job Searching and Hiring

TypeScript | React Native

- Implemented a Tinder-style swipeable card feature
- Developed collaboratively with a designer and another developer
